In July-August, 2018 Novosibirsk State Technical University (Novosibirsk, Russia) offers three summer schools with the DAAD support. We are glad to invite foreign students and young academic staff to join our summer schools and learn new things on science, technologies and Russian culture.

**Advanced Materials and Technologies: Upcoming Challenges in Materials Science and Engineering**

It is our 9th international summer school GEM-2018 on materials science and engineering. It is our most popular project among foreign students with almost a decade of history. This school will be devoted to new challenges and solutions in materials science, like biomaterials, smart materials, ceramic materials, etc.

- **Dates:** 22.07.18-07.08.18
- **Deadline for applications:** 14.04.18
- **Email:** siberiaschool@gmail.com
- **Website:** [http://gem.nstu.ru](http://gem.nstu.ru)

**Controlling Systems for Robotics, Mechatronics and Laser Measurers**

The topics of this school are relevant for the master students directed to the researches in automatics, laser and optic techniques, fundamental metrology, robotics, medical techniques and information technologies. This school will allow increasing the collaboration in the field of joint supervising of the postgraduate students, joint educational programs and science researches in the common humanitarian goals, such as robotic prosthetic device, intellectual wheelchairs, etc.

- **Dates:** 11.08.18-25.08.18
- **Deadline for applications:** 15.05.18
- **Email:** nstusummerschool@gmail.com

**Geophysical Summer Field Camp 2018**

Main goal of this school is to teach and give some practical experience in geophysical studies. Participants will take part in survey planning as well as data processing and interpretation while working in small teams. Practical experience in using state-of-the-art geophysical equipment and methods will be specifically useful for students specializing in Earth Sciences.

- **Dates:** 07.08.18-21.08.18
- **Deadline for applications:** 15.05.18
- **Email:** sib.geocamp@ipgg.sbras.ru
