Admission

Major deficiency in applicant's qualifications (e.g., no bachelor's degree)

Admission requirements not met

Admission requirements not completely met

All admission requirements met

Rejection

Application

Final grade of 3,0

Final grade of 3,5 together with a thesis grade of 2,0

Final grade of 3,5 together with 8 weeks of industrial experience

Admissions Committee checks if admission requirements have been met

Entrance Examination

Admission with conditions:
additional examinations required
requirements to be met within 12 months or student faces expulsion

Admission

1 A provisional application is possible if the student has already achieved an average grade of at least 3.0 together with a) 150 ECTS points (in the case of the 4-semester master's degree) or b) 180 ECTS points (in the case of the 3-semester master's degree).

2 The numbers of points required for specific courses can be found in the Admission Regulations (Masterzulassungsordnung).

3 With the exception of the master's degree course International Mechatronics.

4 These grades use the normal German grading system.

5 The applicant must decide between these two options within a fixed period of time after they receive notification of the Admissions Committee's decision. Once the candidate has made a decision, it cannot be changed within that application period.

6 If the applicant fails the entrance examination (Mastereingangstest, MET), it may be repeated twice only. In a particular application period (i.e., semester), the examination may only be taken once. An applicant who fails the examination can reapply during the next application period and make the decision between the entrance examination and admission with conditions again.
