

## **26th Informatica Feminale and 15th Ingenieurinnen-Sommeruni at the University of Bremen from 16 to 31 August 2023**

Dear readers!

Both the summer universities will take place on the campus of Bremen University (in presence) from 16 to 31 August 2023.

The summer universities are directed at women students of all disciplines, levels and from different types of institutions of higher education, women professionals and all women interested in computing, engineering, technology and interdisciplinary course topics. Additionally, our special topic is sustainability with focus on ecological and social impacts of technologies.

Women lecturers from science and practice will hold classes in small groups. Participants can take part in and earn credit points for classes, workshops and seminars, lasting one or several days. Some 50 courses will be offered to women students as well as to practitioners in the field. Courses will be taught in English and German.

There are specific courses for student beginners as well as for advanced students and for practitioners who wish to get further education on a current academic level. The women networks Ingenieurinnen-Sommeruni an Informatica Feminale are places to exchange about technical and social developments, which we meet in our every-day life and which are designed by ourselves as technical experts.

In addition, field trips to research institutes at Bremen University and to regional companies as well as networking events will be organised. Several companies and institutions will give talks on job opportunities during the three weeks.

Students and unemployed are charged a one-time fee of 40 Euro for a participation of three weeks. Courses of both the summer universities can be combined. Employed women pay a fee of 40 Euro a day, if possible. During the entire summer university, childcare is provided for free.

Registration is possible via the websites:

<https://www.informatica-feminale.de/eng/>

<https://www.ingenieurinnen-sommeruni.de/eng/>

Please bring your students', colleagues' and employees' attention to this offer.

Thank you very much for supporting us!

Yours sincerely,

Center of Excellence Women in Science and Technology
